

DRift-X is specially formulated for use with most herbicides, insecticides and fungicides that are labeled for use in agriculture, forestry, roadside, industrial, non-crop, turf, golf course and ornamentals. **DRift-X** is a deposition and drift management agent that reduces the number of spray droplet fines (<100 microns) and increases the VMD (Volume Median Diameter) of spray droplets. **DRift-X** generates a more uniform droplet size spectrum which results in enhanced deposition and coverage of the spray on the targeted surface.

DRift-X:

- ➔ Delivers 20% more product to the target
- ➔ Provides uniform coverage of products on targeted surface
- ➔ Increases canopy penetration
- ➔ Consistently high performing
- ➔ Approved for use with Enlist Duo™

Enlist Duo is a trademark of The Dow Chemical Company or an affiliated company of Dow

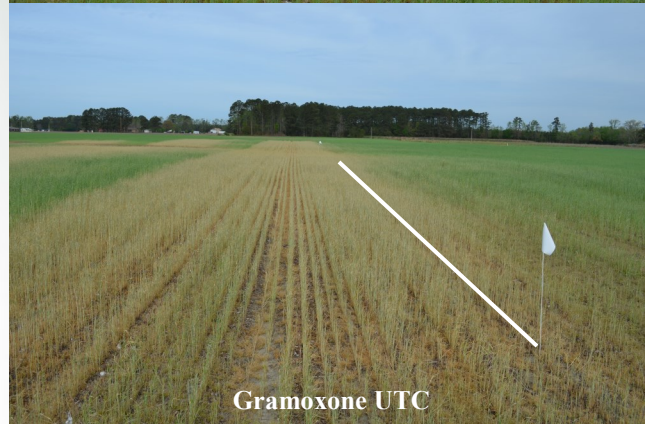

For Ground and Aerial Application

Proper nozzle selection and operation (pressure and spray angle), good operator evaluation and decision making on wind direction, temperature inversions, application speed and susceptible crops in the area combined *with DRift-X* are necessary for maximum drift reduction potential.

Gramoxone + DRift-X

Gramoxone UTC

- ➔ Easy to use
- ➔ In the tank last
- ➔ Broad use
- ➔ Reduces number of driftable fines <100 microns
- ➔ Increases VMD of spray droplets
