

REVERE CORN

The proven hybrid lineup to fit the *Coastal AgroBusiness* footprint.

Other hybrids offered:
0297 VT2PRIB
0518VT2PRIB
1577 RR

0918 VT2P • RM: 109

HYBRID HIGHLIGHTS

- Dual-purpose option for the entire 109 - 110 RM footprint.
- Semi-Determinate ears need more population on more productive acres.
- Strong anthracnose scores make this an excellent option for Eastern Corn on Corn acres.

1307 TC • RM: 115

HYBRID HIGHLIGHTS

- Exciting Trecepta hybrid with strong geographical movement.
- Consistent semi-determinate ears allow higher pops in better soils.
- Robust plant with good health makes a fantastic dual purpose choice.

1577 VT2P • RM: 115

HYBRID HIGHLIGHTS

- Proven, consistent, broad acre 115 RM Hybrid.
- Great early vigor suitable for early planting and No-Till.
- Semi-flex ear but responds to plant population and management.

1627 TC • RM: 116

HYBRID HIGHLIGHTS

- Full season Trecepta hybrid with top end yield potential and broad acre fit!
- Unique combination of yield, stress tolerance and grain quality.
- Semi-flex ears and taller plant type fit southern wide row environments perfectly.

1839 TC • RM: 118

HYBRID HIGHLIGHTS

- Full season Trecepta with great heat tolerance.
- Taller plant type stays strong on wide rows.
- Very good late season intactness with clean grain.

REVERE SOYBEANS

Unparalleled varieties performing for *Coastal AgroBusiness* growers.

Other hybrids offered:
0297 VT2PRIB
0518VT2PRIB
1577 RR

48-F72 • MG: 4.8

VARIETY HIGHLIGHTS

- New! XtendFlex® Late Group IV with RKN!
- Medium plant structure that dries down like an early V.
- Goes on the nematode acre or stronger soils where nematodes are not present.

49-F36 • MG: 4.9

VARIETY HIGHLIGHTS

- New! High yielding Xtendflex® fit for North Carolina and Virginia.
- Excluder for salt that is good full season or double crop.
- Tall, medium bush that's a very attractive and stands all the way to harvest.

53-F84 • MG: 5.3

VARIETY HIGHLIGHTS

- New! Semi-determinate Xtendflex® with excellent top end potential in the Coastal footprint.
- Aggressive plant type that leans more like a determinate.
- NOT RKN, but very good disease package, especially on FELS.

5429E3 • MG: 5.4

VARIETY HIGHLIGHTS

- Proven! Indeterminate Mid Group V that brings step change yield performance in the Enlist E3™ platform.
- Tall variety that shades quickly and stands well.
- Salt excluder, MR RKN, with excellent disease scores make this a must plant group V.

5735XFS • MG: 5.7

VARIETY HIGHLIGHTS

- Proven! Mid Group Xtendflex® Excluder.
- Resistant to Southern Root Knot.
- Bushy, determinate, tawny and had quickly become a favorite to farmers who plant determinate soybeans.

6016XFS • MG: 6.0

VARIETY HIGHLIGHTS

- Proven! Xtendflex® Sufonylurea tolerant determinate MG6 for East Coast environments.
- Wide stance for most all-row configuration.
- Root Knot nematode resistant.

62-F24 • MG: 6.2

VARIETY HIGHLIGHTS

- New! Xtendflex® Determinate, Root Knot Nematode, Excluder.
- Finally a "flex" replacement for 6206X.
- Attractive bushy, tawny tan variety that stands well -- medium-tall structure.

6927XF • MG: 6.9

VARIETY HIGHLIGHTS

- Proven! Xtendflex® excellent field performance across soil types and yield environments.
- Medium-Tall plant type with a wide stance and good standability.
- A salt excluder with root knot resistance makes this a must plant for South East.
