

# Impact S

# Impact F

## Impact Biologicals For Cotton

### Impact S

#### Layby Nitrogen Application

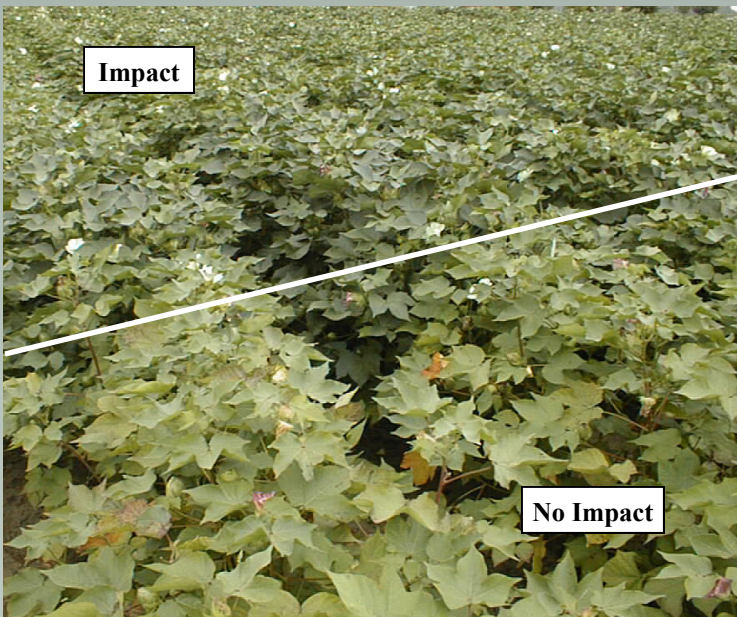

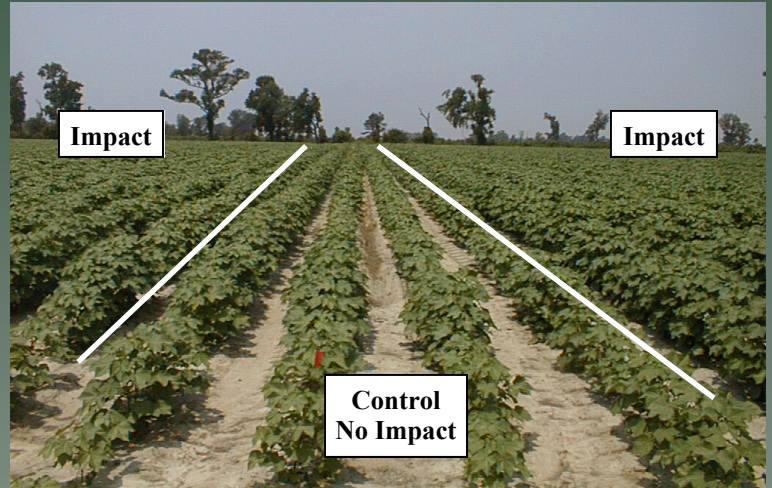

Use 1 quart Impact S per acre with nitrogen layby application. Best results realized if layby nitrogen/Impact S application is knifed in.

#### In Furrow at Planting or in Starter 2 x 2

Use 1 quart Impact S per acre in furrow or in 2 x 2 starter application.

### Impact F

**At Flowering:** Use 1 quart Impact F as a foliar application at flowering. For best results, make a second foliar application 10 to 14 days after first application.

## Benefits

- Improve chemical and fertilizer efficiency
- Increased plant photosynthesis
- Increased plant health – greater disease resistance (SAR elicitor materials)
- Root development
- Increased Fruit Set
- Greater stress management
- Increased crop yield and quality
