

Impact S

Impact F

Impact Biologicals For Tobacco

Impact S in Greenhouse or Transplant Water

Greenhouse Plant Bed: Use 2 to 3oz. per 100 gallons of water 1 to 2 weeks after emergence then 1 to 2 oz. per 100 gallons 7 to 10 days before transplanting.

Transplant Water: 1 to 2 qts. Per 100 gallons

When applying to greenhouse water, do not apply with fungicide. Impact S should be evenly distributed throughout plant bed. Can be applied with soluble fertilizers.

For maximum benefit, apply 1-2 qts per acre of Impact F at lay-by.

Benefits

- Improve chemical and fertilizer efficiency
- Increased plant photosynthesis
- Increased plant health – greater disease resistance (SAR elicitor materials)
- Root development
- Quicker establishment after transplant
