

COASTAL NURSE TRAILER

Coastal Nurse Trailers are available with a 1,000 gallon black, High Density Polyethylene (HDPE) tank. Tanks include molded baffles and legs, and are attached to the frame with metal hoops. Either 1½" or 2" plumbing to a 4-HP gasoline engine pump and quick connect fittings allow for fast transfer. Mix-N-Fill tanks are optional.

Variable height pin or ball hitch with NC DOT specification safety chains, 2-weight rated electric brake axles, lights, and wiring allow for safe highway travel. The highway tread or ribbed implement tires of your choice are covered by 2" x 12" x 12' fender boards. Extra heavy duty construction provides for many years of use.

- 1 Rear Site Gauge
